“Working in an inner-city ER, I see all walks of life and problems. I work in an academic setting at a city hospital and mentor medical students, residents, and fellows. Adversity abounds all over in different shapes and sizes, and some truly unimaginable. I find myself realizing, while Aric is not a trained therapist, he is an inspiration, motivator, and is able to help everyone who takes the time to work through his methods. I was struck by how each step in Aric’s *Change Navigation Model* makes sense, is critical, and flows simply. His model is exceptionally helpful, sensible, and intuitive. Aric teaches beautifully how we all face adversity and how we characterize it individually, as our perspective is how we see the depth and severity of the adversity. You must believe in yourself, as Aric did; and use his steps to conquer!”

“Last night I had to put my dog, Nicky Bear down. He is half Golden Retriever, half German Shepard, and he was my best friend. I was up all night crying because he wasn’t sleeping on the floor next to me, and instead outside buried in our backyard. I just wanted to dig him up and bring him back inside. Anyways, I just want you to know that I am in step one of your *Change Navigation Model*. I am not a crier, and I don’t do well with any type of emotional drama. But, because of your teachings on becoming an *Adversity Rockstar*, I am choosing to face it head-on; instead of burying my emotions deep inside. So, thank you!”
